PASSWORD SETTING AND CHANGING

Notice:

- The default factory password for the electronic lock is "123456".
1. Press the green button (code change switch) inside the box, the buzzer will beep once, and the setting light will turn on.
 2. Enter the password you need, with a length of 3-12 digits.
 3. Press the "#" key to confirm, the buzzer will play a chord, the setting light will go out, and the door opening light will turn on, indicating that the password setting and changing are successful.

GROUP 2 PASSWORD SETTING

- Press 00, then press the green button (code change switch) inside the box, then enter the new password and confirm the end with the # key. The password length is 3-12 digits.

OPENING THE SAFE

1. Press the buttons to enter the password you set.
2. Press the "#" key to confirm, the buzzer will beep twice, and the password is correctly entered, indicating that the electromagnet is attracted. Turn the handle to open the door, which takes 5 seconds and will automatically close after that.

VIBRATION ALARM SETTING

1. The vibration alarm electronic lock alarm has the functions of setting alert and eliminating alert.
2. Alert setting method: Press the "*" key, and the three status lights will turn on, indicating that the alert state is entered. The safe will alarm immediately after vibration.
3. Method of lifting the alert: After the safe alarms, enter the set password and press the "#" key to open the door, which can eliminate the alert.

UNDER VOLTAGE INDICATION

1. The system uses four 1.5V alkaline batteries. If the voltage is insufficient, it will continuously remind "Di, Di, Di" after opening the door. "Di, Di, Di" twice, and the red light will turn on to remind the user to replace the battery in time.
2. If the battery voltage is insufficient, emergency power or a mechanical emergency key can be used for operation.
3. This electronic lock has the function of power-off protection, and the password will never disappear.

ALARM OPERATION

This electronic lock has 3 (5) times of wrong password, and it will automatically alarm for 30 seconds or 1 minute. Entering the correct password can eliminate the alarm sound.

SYSTEM INITIALIZATION

Long press the green button on the mechanism for 5 seconds, the buzzer will play a chord, and the system will restore the initialization settings and clear all passwords.

HOW TO WALL OR FLOOR MOUNTING

- * The safe may be mounted to a wall or floor.
 - * Drill the appropriate size holes for the anchors you are using
 - * Mount the safe by running screws from inside of the safe and securing to anchors; ensure the safe is mounted securely
