## Assembly Instructions

1) Connect the quick female coupler to your Airgun cylinder, Air Bottle or Airsoft products

2) Connect another end foster to the output on the front of compressor via a male fitting. Make sure the foster coupling

3) Connect the supplied AC power cord to the right-hand side of the main unit and connect the three-pin plug to the mains power outlet.

4) Manually rotate the needle of the automatic shut- off system to the pressure you want.

### **WARNING!**

NEVER overfill the maximum pressure of your cylinder and airgun. The maximum pressure for this compressor is 310bar (31Mpa/4500PSI)

5) Press the FAN button on the top of the compressor to start the cooling fan.  
**ATTENTION!** Always run the fan cooling first before starting compressor.

6) Close the air bleed valve on the front of the main unit by turning it clockwise. It need only be finger tight

7) Finally, press the POWER button on the top of the main unit. The compressor unit will audibly start up and the charging process will begin.

**NOTE:** If the working temperature exceeds 80 degrees Celsius, the compressor MUST be manually switched off, you can presse the POWER button to make the compressor stop working. Keep the cooling fan left running. Restart the compressor function once the compressor has cooled down.

## FCC Information

**CAUTION:** Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment!

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- 1) This product may cause harmful interference.
- 2) This product must accept any interference received, including interference that may cause undesired operation.

**WARNING:** Changes or modifications to this product not expressly approved by the party responsible for compliance could void the user's authority to operate the product.

**Note:** This product has been tested and found to comply with the limits for a Class B digital device pursuant to Part 15 of the FCC Rules, These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This product generates, uses and can radiate radio frequency energy, and if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this product does cause harmful interference to radio or television reception, which can be determined by turning the product off and on, the user is encouraged to try to correct the interference by one or more of the following measures.

- Reorient or relocate the receiving antenna.
- Increase the distance between the product and receiver.
- Connect the product to an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for assistance

### **CORRECT DISPOSAL**

This product is subject to the provision of European Directive 2012/19/EU. The symbol showing a wheeled bin crossed through indicates that the product requires separate refuse collection in the European Union. This applies to the product and all accessories marked with this symbol. Products marked as such may not be discarded with normal domestic waste, but must be taken to a collection point for recycling electrical and electronic devices.
